To whom it may concern

**Testimonial for Stephanie Ho Yen Yuin (NRIC: \*\*\*\*\*362E)**

Stephanie joined the Temasek Polytechnic School of Informatics & IT in April 2021 to pursue a Diploma in Game Design & Development and performed consistently well in all her subjects. In fact, Stephanie also attained the Directors List in the first and second years of her studies, which is awarded to the top 10% of her cohort.

Stephanie has been a highly intellectual and self-motivated student, who excelled in areas such as game modelling, game design, and coding. In the second year, Stephanie was involved in working with industry partners, including the Ascott Group, where she led a team that worked with stakeholders from the hospitality industry to build immersive applications to enhance the customer experience for one of their properties.

During her eight-month internship and final year project with Viziofly, she worked on multiple projects in the areas of immersive media and game development. As part of her responsibilities in the projects, Stephanie was involved in meeting with the stakeholders, the creation of game models, character development and integration of codes. The company strongly commended Stephanie on her work ethic and ability to apply her skills of modelling and coding.

At the Polytechnic, Stephanie was involved in co-curricular activities, including being a committee member of the Special Interest Group for the diploma in 2022 and 2023. Stephanie also was a Student Ambassador in assisting her lecturers to teach game design to secondary school students. Through all these experiences, Stephanie earned the respect of her peers.

Stephanie aspires to further her studies and has the attributes to succeed in whatever she puts her mind to. Given her dedication, hard work, passion for learning and strong interpersonal skills, I am confident that Stephanie will do very well in her future endeavours and leave a lasting impact on any institution she joins.
